MATERIALS AND FINISHES

This chair is made using traditional techniques.

Armchair with a solid oak frame. The slats in the back are also made from solid oak.

The whole structure is finished with a water-based varnish, transparent to preserve the natural colour of the wood. The procedure used is the sand and strop method: two undercoats with sanding in-between and a topcoat of water-based varnish. This protects the chair from atmospheric damage, also improving its physical and chemical resistance.

Seat upholstered in raffia with a checked design.

MAINTENANCE

Clean with a damp cloth and mild soap. Rinse and dry with a dry cloth. Avoid abrasive products.
